

Two steady years, then a 2026 slump.

Revenue and orders were flat and healthy through 2024 and 2025. From February 2026 both fell by a third, 3.85% of payments fail on every method, and Electronics earns half of all revenue.

1.26M

revenue in 2024 (1.25M in 2025)

–40%

revenue drop, Jan → Feb 2026

3.85%

of payments fail (1,924 orders)

51%

of revenue from Electronics

Revenue, order, product and category charts count completed, paid orders (42,849); payment charts count all 50,000.

2024 revenue held steady every month

~105k

average monthly revenue

Every month landed between 96k (Feb) and 114k (Mar), so 2024 had no weak season.

The line peaks in March and July (~113.5k) but shows no lasting upward or downward trend.

2025 was a near copy of 2024

1.25M

2025 revenue, vs 1.26M in 2024

Monthly revenue stayed between 95k and 113k, the same tight band as 2024.

February was the softest month (95.4k), while May (112.4k) and November (113.2k) peaked.

Orders held at ~1,500 a month, until 2026

-33%

monthly orders, Feb–Jun 2026 vs 2025

2024 orders ran steadily at 1,366–1,612 a month, about 1,500 on average.

2025 kept the same rhythm, with 1,357–1,577 orders a month.

After 1,500 orders in January, 2026 fell to just 928–1,086 a month.

2026 revenue dropped 40% after January

-40%
revenue, January → February 2026

Revenue fell from 107.5k in January to 64.4k in February and has stayed at 70k–75k since.

H1 2026 totals 462k, 26% below the 624k earned in H1 2025.

PAYMENTS

Gateway leads, but every method fails ~4%

1,924

failed payments: 3.85% of 50,000 orders

Gateway handles about 48% of payments, ahead of CardToCard (~24%), Wallet (~18%) and Cash (~10%).

Gateway processes 23,822 of 50,000 orders, about double CardToCard's 11,946.

Failure rates run from 3.6% (Cash) to 4.0% (Unknown), so the issue is system-wide, not one provider.

Electronics earns half of all revenue

1.51M

Electronics revenue, of 2.98M total

Cheap add-ons sell the most units (Notebook 8,879, Phone Case 8,248), while Monitor and Tablet sell ~1,000 each.

Electronics brings in 1.51M (51%), more than Accessories, Home Office, Wearables and Gaming combined.

Three recommendations

1

Win back lost customers

The 2026 drop hit every category, city and segment while order value held at ~70, so buyers left. Run win-back campaigns, VIPs first (-45%).

2

Cut payment failures below 2%

1,924 failed payments cost ~128.5k. Add retries and a backup method at checkout, starting with Gateway (48% of orders).

3

Grow around Electronics

Electronics earns 51%. Keep Headphones and Tablets in stock and bundle best-selling cases and cables with them.
